

MentorNet

Experience a Better Future

A Division of Great Minds in STEM™

STRENGTHEN YOUR COMPANY'S INVESTMENTS IN DEVELOPING DIVERSE STEM TALENT

MentorNet's innovative mentoring service combines the technology of social networks with the social science of mentoring to connect mentors and mentees across generational, gender, racial, cultural, and socio-economic boundaries.

Partner with **MentorNet** to enhance your student outreach programs and deepen the relationship your company has with affiliated college students.

MentorNet's primary objective is to support the persistence and advancement of mentees, especially those from under-served and under-represented groups, in their STEM education through mentorships that are aligned with a mentee's educational stage – from freshman year through their Ph.D.

Benefits for MentorNet's corporate partners are many. MentorNet will help you to strengthen relationships established with students through internships, scholarships, national conferences, university relations, and other affiliated student programs. MentorNet will provide your employees opportunities to enhance their management and leadership skills through convenient and rewarding virtual mentorships. MentorNet mentorships can help increase a mentee's awareness of the various career pathways at your company and demonstrate your company's commitment to their academic and professional success.

92%

of MentorNet mentees who graduate with a STEM degree

50%

of mentees who explore careers with their mentor's company

81%

of mentees who are female or an under-represented minority

139

Number of STEM fields represented

**MENTORSHIPS SPAN 16 WEEKS
AND BONDS BUILT THROUGH
MENTORNET CAN SPAN A LIFETIME!**

How it Works

As a MentorNet partner, your company receives:

- ▶ A virtual mentoring service that connects your affiliated students and employees in mentorships
- ▶ A co-branded customized community
- ▶ A research-based program that facilitates effective mentorships in your community, and that promotes the mentees' persistence in completing a STEM degree
- ▶ Data about your community that supports mentoring goals

The MentorNet team will work with you to:

- ▶ Develop a plan to recruit mentors and mentees aligned with your student outreach programs
- ▶ Support your mentees and mentors throughout their MentorNet experience

As mentors, your employees will:

- ▶ Receive pre-mentorship training via brief online tutorials on mentorship best-practices
- ▶ Receive weekly topics that spark meaningful dialogue with mentees and address issues known to impact student persistence
- ▶ Have the opportunity to engage in skills-based volunteerism

Expand Your Outreach

The core strength of MentorNet's service is the STEM focus of our mentee/mentor discussion topics. Above and beyond this solid foundation, our corporate partners may further customize the MentorNet service by adding profile questions that capture data unique to your mentees and mentors, as well as by delivering content of specific interest or importance to your company. The MentorNet team will work with you closely to develop custom content and integrate it into your mentoring service. The investment required for a customized program depends on the complexity of the content.

We seek partners that share in our mission to:

- ▶ Increase the number of STEM degree graduates in the U.S. especially from under-served and under-represented groups – women, minorities, and first generation to college.
- ▶ Foster a prevalent culture of mentoring in STEM fields and empower individuals to persist and succeed in their fields.

Learn how MentorNet helps our corporate partners develop the best, diverse STEM minds entering the workforce.
